## FOREWARD

TO: Hospital Administrators,  
Medical Staffs, and Nurses

This is the 1967 report of infant and fetal mortality rates of Montana hospitals. The figures in this report were taken from birth and death certificates reported to the State Department of Health, Division of Records and Statistics.

In 1967 there were 11,974 births in Montana by place of occurrence. There were 202 neonatal deaths, with a rate of 16.9 per 1,000 live births. There were 146 stillbirths, with a rate of 12.2 per 1,000 live births. Perinatal deaths numbered 348, with a rate of 29.1 per 1,000 live births.

This report allows each hospital to see where it stands in relation to other Montana hospitals, and it may indicate a need for evaluation of services to insure improvement in the future.
